Product Description

LaneShark: C-Flow Third-Function Valve Kit

The Lane Shark "**C-Flow 3rd Function**" is an innovative hydraulic valve kit that optimizes the operational versatility of your tractor. This third function valve kit integrates seamlessly into your existing loader valve, granting you the ability to employ a wide variety of attachments beyond the tractor's first (lift) and second (tilt) functions.

Full C-Flow Hydraulic Kit Includes:

- WR Long 3rd Function Valve Kit
- Lane Shark Switch Handle
- Lane Shark C-Flow Valve Component
- Expanded Bulkhead Mount with Return Connect
- C-Flow Component Return Line
- Pre-Fabricated Hydraulic Whips with Check Valve Loop
- Wiring Circuit Tester
- Electrical Connectors and Wrap
- Wire Loom
- In-Line Fuse

The Lane Shark "C-Flow 3rd Function" Valve Kit offers a unique continuous flow function that enhances your tractor's efficiency and performance. This setup is made possible by a special return line, which forms a closed loop for the hydraulic fluid to circulate continuously throughout the tractor. At the heart of this operation is the LS Switch Handle. When engaged, it holds the hydraulic valve open, ensuring a steady and uninterrupted flow. This feature is particularly beneficial when operating attachments like the Lane Shark Brush Cutter, optimizing its operation for a smoother and more effective land management experience.

The C-flow third-function valve kit is crucial for maintaining the power needed to cut through tree limbs, brush, saplings, and underbrush. This uninterrupted flow allows the Lane Shark hydraulic attachment to operate more smoothly and efficiently, reducing the time and effort required for land management tasks. We offer WR Long third-function kits for an array of front-end loader tractor brands—we'll help you find the right kit for your machine.

The increased hydraulic capability from the C-flow third-function valve kit doesn't just save time; it also

ensures a more precise and effective cutting action. Clean and accurate cuts allow you to improve the quality of your work. This precision minimizes damage to surrounding vegetation and reduces the likelihood of complications, leading to healthier landscapes and less follow-up maintenance. Shop with Lane Shark USA today for C-flow third-function valve kits to streamline brush cutting and get better results.
